

Your Technology Solutions Provider Leading the Way®

Who We Are

RedLinX® is a multifaceted specialist engineering technology company, offering leading edge technologies from embedded to high-performance computing and related products, open-systems and solutions.

RedLinX® operates in the ICT, Transport, Mining, Industrial, Security and Defence market segments throughout South Africa and Africa and is supported by our own locally based support, production and engineering facilities.

What We Do

RedLinX® prides itself in working closely with each client to ensure that we always find the best and most cost-effective solution that has long-term sustainability for every customer's business. We aim to provide our customers with tailor-made solutions that will add value to their operations and businesses. We provide our customers with 24/7 technical support, and are always willing to go the extra mile.

Where We Are

RedLinX® operates from its office in Cape Town, supporting operations throughout South Africa and the rest of Africa through its partner channels.

Our Values

Our Product Lines

Rugged & Industrial-Grade Products include highly rugged tablets, notebook PCs, handheld devices, keyboards, displays, panel PCs, solid-state drives, FPGA boards, video/graphics processors and industrial PCs based on PICMG, Mini-ITX, Nano-ITX, Pico-ITX, Qseven and Mobile-ITX form factor processor boards.

Bus-Based Products include air-cooled and conduction-cooled systems, backplanes and modules based on VME, VXS, VPX, CompactPCI and PC/104 bus technologies. We also offer a variety of add-on daughterboards for these systems in the form of AMC, XMC, PMC, IndustryPack and Acropack modules.

Servers & Workstations are based on award-winning Tyan platforms which offer superlative performance. Most of our servers are designed to fit into an industry standard 19" rack and are available in various heights in the range 1U to 5U.

Engineering Projects utilise our experience and capability to manage and execute complex technology projects that include mechanical, electronic and computer system engineering. We specialise in the ruggedisation of consumer electronics for use in harsh environments and also create reliable system level products for use in more benign environments.

B-BBEE

RedLinX® is a Level 4 Contributor with 100% BEE Recognition Level. Most of our staff and management are PDI/HDI and engendered individuals. RedLinX® is proud to be aligned with the ICT BEE charter.

Corporate Social Investment

Our corporate social responsibility activities focus on contributing to the upliftment of communities and we aim to stay actively involved therein.
